

# **Simlat Delivers Automatic UAS Operator Performance Assessment Systems to the Australian Forces**

***Simlat Ltd. has delivered two automatic performance assessment systems for UAS operation candidates to the Australian Forces. The systems were provided as part of a systems upgrade for the Australian Forces' Skylark Mini-UAV Simulators.***

Herzliya, Israel, July 18, 2010 – Simlat Ltd. announces the delivery of two UAS-SPOT (Screening by Performance-Oriented Testing) Systems to the Australian Forces. The systems are currently being used by the Australian Forces for automatic evaluation of UAS operators. Simlat was awarded contract for the SPOT systems as part of a UAS simulators upgrade for the Skylark Mini-UAV.

"The UAS-SPOT, a flagship product of Simlat's Human Factors Business Line, was developed for the last 6 years in light of the growing shortage in UAS operators and the need to facilitate and improve the screening process," says Yuval Peshin, Simlat President. "The candidate can run through the SPOT tests independently while his performance is automatically monitored and evaluated by the SPOT, saving precious time and money. Test results are presented in clear and focused reports, offering insight to the candidate or operator's skills, and assuring the selection of the top candidates. This shortens qualification and training time without compromising quality."

## **About Simlat-UAS Training:**

Simlat Ltd., an Israeli-based company located in Herzliya, is a leading provider of next generation mission-training solutions for unmanned vehicles systems and for Intelligence, Surveillance and Reconnaissance (ISR). Based on extensive hands-on operational experience, Simlat offers training for every UAV Platform, Payload and Mission. Simlat's turnkey training solutions include SIGINT, EO/IR and SAR sensors in various operational configurations. Simlat's systems are available as stand-alone or embedded/integrated to legacy control stations.

See Simlat at booth # 2822 at the AUVSI 2010.
